|  |  | 209  | Phosphorus or heavy metal   |
|--|--|--|---|
| This Class 530 is considered to be an integral part of Class 260 (see the Class 260 schedule for the position of this Class in schedule hierarchy). This Class |  |  | containing material, elemental hydrogen, sulfur dioxide, or carbon dioxide used in the process, or product thereof                            |
|  | all pertinent definitions and nes of Class 260.  | 210  | Rosin or derivative used as starting material in process, or product thereof (e.g., using gum rosin, wood rosin, solid tall oil rosin, etc.)  |
| 200  | NATURAL RESINS OR DERIVATIVES (E.G., WOOD OR PINE TAR;   | 211  | <pre>Polymerization or product   thereof (e.g., dimer rosin,   etc.)</pre>  |
|  | CATIVO RESIN DERIVATIVES,<br>ETC.)   | 212  | Chemical treatment or color   |
| 201  | .Shellac containing starting   |  | modification of polymerized   |
| 201  | material used in process, or product thereof (e.g., lac, sticklac, seedlac, flake shellac, bleached shellac, etc.)   |  | rosin or derivative, or product thereof (e.g., hydrogenation or   |
|  |  |  | esterification of polymerized rosin; removal of color bodies  |
| in process, or pro   | <pre>.Cut wood starting material used in process, or product thereof (e.g., using pine stumps,</pre>   | 213  | from polymerized rosin, etc.) Boron or phosphorus containing material used in the process,  |
|  | <pre>chips, bark, etc., as starting material)</pre>  | 214  | or product thereofDiels-Alder adducts (e.g., of   |
| 203  | .Plant sap or fossil starting material used in process, or product thereof (e.g., using copal, coal, amber, dammar,  |  | <pre>maleic anhydride, fumaric acid, etc., with conjugated dienes, such as rosin acids, terpenes, etc.)</pre>                                 |
| 204  | etc., as starting material)Pine oleoresin starting   | 215  | Esterification of rosin or derivative via carboxyl group,   |
|  | <pre>material used in process, or product thereof (e.g., using gum turpentine, pine gum, pine resin, etc., as starting material)</pre>   | 216  | or product thereofChemical treatment or color modification of esterified rosin or derivative, or product thereof (e.g., partial               |
| 205  | derivatives from papermaking waste, purification of tall oil, or separation of components of tall oil; or product thereof (e.g., separation of rosin, fatty acids, sterols, etc.; decolorizing, etc.) Organic sulfur or nitrogen containing material used in |  | <pre>saponification of rosin triglycerides; removal of color bodies from rosin esters, etc.)</pre>  |
|  |  | 217Oxygen containing ring halogen containing mat used in the esterifical product thereof (e.g., alkylene oxides, | <pre>Oxygen containing ring or halogen containing material used in the esterification, or product thereof (e.g., using alkylene oxides,</pre> |
| 206  |  | 218  | <pre>polysaccharides, alkyl   halides, etc.)Polyhydroxy material used in   the esterification, or product</pre>                               |
| 207  | Esterification used in the process, or product thereof   |  | <pre>thereof (e.g., forming ester gum, etc.)</pre>  |
| 208  | Inorganic material used in the process, or product thereof (e.g., using sulfuric acid, boric acid, etc.)   |  |   |

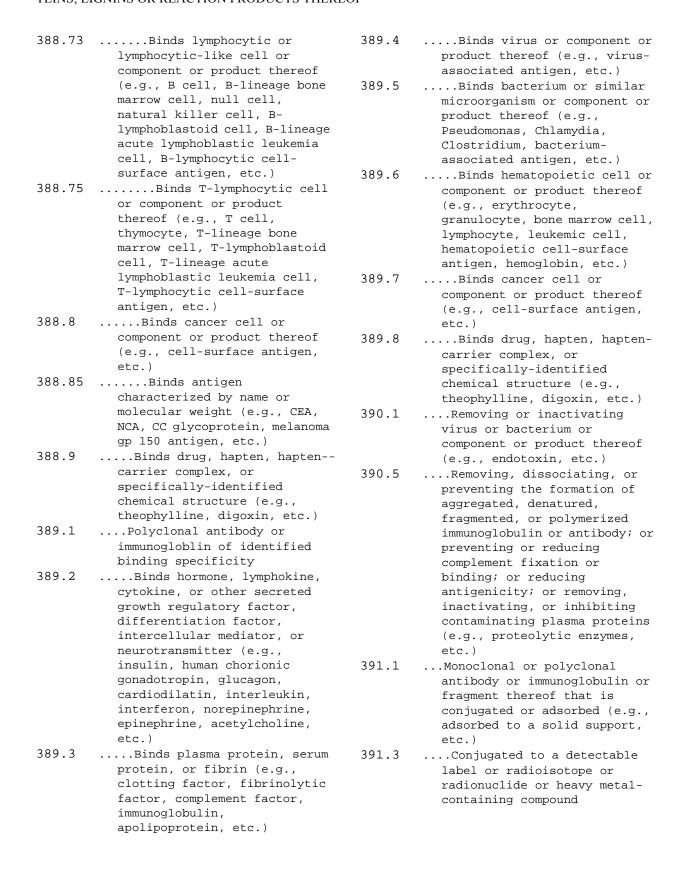

## 530 - 2 $\,$ CLASS 530 CHEMISTRY: NATURAL RESINS OR DERIVATIVES; PEPTIDES OR PROTEINS; LIGNINS OR REACTION PRODUCTS THEREOF

| 219      | Sulfur, selenium, or tellurium containing material used in the process, or product thereof (e.g., disproportionation of rosin, | 233 | Sulfur, boron, phosphorus, or iodine containing material used in the process, or product thereof |
|----------|--|-----|--|
|          | etc.)  | 300 | PEPTIDES OF 3 TO 100 AMINO ACID RESIDUES   |
| 220      | The sulfur, selenium, or tellurium containing material   | 301 | .Thymopoietin or Lipotropin; related peptides  |
| 221      | is inorganicNitrogen containing material   | 302 | <pre>.Endorphin and Enkephalin;   related peptides</pre>   |
|          | used in the process, or  | 303 | .Insulin; related peptides   |
|          | product thereof  | 304 | Metal complexes, e.g., Zn-   |
| 222      | The nitrogen containing  |     | insulin, etc.  |
|          | material is inorganic  | 305 | Isolation or purification  |
| 223      | Hydrogenation or product   | 306 | .Corticotropin (ATCH); related   |
|          | thereof (e.g., forming dihydro   |     | peptides   |
|          | rosin acids; rosinyl alcohol   | 307 | .Calcitonin; related peptides  |
|          | or derivatives; etc.)  | 308 | .Glucagon; related peptides  |
| 224      | Metal containing material used to form salts of rosin acids,   | 309 | .Secretin or gastrin; related peptides   |
| 225      | or product thereofAlkali metal containing  | 310 | .Gramicidin or Tyrocidin; related peptides   |
|          | <pre>material (i.e., Li, Na, K, Rb or Cs)</pre>  | 311 | .Somatostatin (SRIF); related peptides   |
| 226      | Heat treatment of rosin or derivative in the absence of  | 312 | .Melanotropin (MSH) or eledoisin;  |
|          | nonrosin organic reactants, or   | 313 | related peptides .Lutenizing hormone releasing   |
|          | product thereof (e.g., forming   | 313 | factor (LRF); related peptides   |
|          | rosin oil; disproportionated, dehydrogenated, or isomerized  | 314 | .Bradykinin; kallidin; related peptides  |
| 227      | rosin; etc.)Metal, halogen, or silicon   | 315 | .Oxytocin; vasopressin; related peptides   |
|          | containing material used in  | 316 | .Angiotensin; related peptides   |
|          | the process, or product  | 317 | .Cyclic peptides   |
|          | <pre>thereof (e.g., using clay, zeolites, etc.)</pre>  | 318 | The cyclisation occurring  |
| 228      | Purification process or product  |     | through the 4-amino radical of 2,4-diamino butanoic acid   |
| 229      | Immiscible solvents used in  | 319 | Polymyxin; related peptides  |
|          | the process, or product  | 320 | Bacitracin; related peptides   |
|          | thereof  | 321 | Containing only normal peptide   |
| 230      | .Tall oil or derivative used as starting material in process,  |     | links in the ring, i.e., homodetic cyclic peptides   |
|          | or product thereof (e.g., metal salts of tall oil fatty  | 322 | <pre>.Peptides containing saccharide<br/>radicals, e.g., bleomycins,<br/>etc.</pre>              |
|          | <pre>acids; tall oil pitch, etc.) dehydrogenated, or isomerized</pre>  | 323 | .Peptides with at least one  |
| 231      | rosin; etc.)Nitrogen containing material   |     | nonpeptide bond other than a<br>disulfide bond joining two or<br>more sequences of amino acid    |
|          | used in the process, or product thereof  |     | residues, e.g., homomeric  |
| 232      | Esterification of tall oil   |     | heterodectic peptide other   |
| <u> </u> | acids, or product thereof  |     | than cyclic disulfide,<br>depsipeptides, etc.  |
|          |  |     |  |

| 324 | .25 or more amino acid residues  | 357  | Keratin  |
|-----|--|------|--|
| 205 | in defined sequence  | 358  | .Nucleoproteins, e.g., chromatin,                                |
| 325 | .24 amino acid residues in defined sequence                            |      | <pre>chromosomal proteins, histones, protamines, salmine,</pre>  |
| 326 | .15 to 23 amino acid residues in                                       |      | etc.   |
|     | defined sequence   | 359  | .Lipoproteins, e.g., egg yolk                                    |
| 327 | .11 to 14 amino acid residues in defined sequence                      | 360  | proteins, cylomicrons, etcCasein or caseinate                    |
| 328 | .8 to 10 amino acid residues in  | 361  | Separation, purification or                                      |
| 320 | defined sequence   | 301  | synthesis  |
| 329 | .6 to 7 amino acid residues in   | 362  | .Albumin   |
|     | defined sequence   | 363  | Serum albumin, e.g., BSA, HSA,                                   |
| 330 | .4 to 5 amino acid residues in   |      | etc.   |
|     | defined sequence   | 364  | Separation, purification or                                      |
| 331 | .Tripeptides, e.g., tripeptide   | 0.45 | synthesis  |
|     | thyroliberin (TRH), melanostatin (MIF), etc.                           | 365  | Lactalbumin, e.g., milk source, etc.                             |
| 332 | .Containing at least one abnormal                                      | 366  | Separation, purification or                                      |
|     | peptide link, e.g., gamma  |      | synthesis  |
|     | peptide bonded, etc.   | 367  | Ovalalbumin, e.g., avidin,                                       |
| 333 | .Synthesis of peptides   |      | conalbumins, etc.  |
| 334 | <pre>Polymer supported synthesis,   e.g., solid phase synthesis,</pre> | 368  | Separation, purification or synthesis                            |
|     | Merrifield synthesis, etc.   | 369  | Separation, purification or                                      |
| 335 | Protecting or removing   |      | synthesis  |
|     | protective groups, e.g.,   | 370  | .Plant proteins, e.g., derived                                   |
|     | carboxyl group protection, etc.  |      | from legumes, algae or lichens, etc.                             |
| 336 | Of side chain or sulfur  | 371  | Derived from fungi, e.g.,  |
|     | containing group   | 371  | yeasts, mushroom, etc.   |
| 337 | Of amino group   | 372  | Derived from grain, e.g.,  |
| 338 | Solution phase synthesis   |      | prolamines, etc.   |
| 339 | Segment condensation, e.g.,  | 373  | Zein   |
|     | Ugi condensation, etc.   | 374  | Gluten or gliadin  |
| 340 | With phosphorus containing   | 375  | Derived from wheat   |
|     | material   | 376  | Derived from corn  |
| 341 | With use of carbonimide or imidiazole                                  | 377  | <pre>Derived from oil seed, e.g.,   cotton seed, rapeseed,</pre> |
| 342 | Mixed anhydride synthesis  |      | sunflower, etc.  |
| 343 | By hydrolysis  | 378  | Derived from soybean   |
| 344 | .Separation or purification  | 379  | Derived from leafy green   |
| 345 | .Chemical aftertreatment, e.g.,  |      | plants, e.g., alfalfa pollen,                                    |
|     | acylation, methylation, etc.   |      | etc.   |
| 350 | PROTEINS, I.E., MORE THAN 100  | 380  | .Blood proteins or globulins,                                    |
|     | AMINO ACID RESIDUES  |      | e.g., proteoglycans, platelet                                    |
| 351 | .Lymphokines, e.g., interferons,                                       |      | factor 4, thyroglobulin,   |
| 250 | interlukins, etc.  | 201  | thyroxine, etc.  |
| 352 | .Phosphoproteins, e.g.,  | 381  | Blood coagulation factors and                                    |
| 252 | phosvitin, vitellogenin, etc.  |      | fibrin, e.g., thromboplastin, etc.                               |
| 353 | <pre>.Scleroproteins, e.g., fibroin,   elastin, silk, etc.</pre>       | 382  | Fibrin or fibrin   |
| 354 | Gelatin  | 552  | intermediates, e.g.,   |
| 355 | Separation, purification or  |      | fibrinogen, etc.   |
| 333 | synthesis  | 383  | Blood coagulation factor VIII,                                   |
| 356 | Collagen   |      | AHF  |
|     |  |      |  |

## 530 - 4 CLASS 530 CHEMISTRY: NATURAL RESINS OR DERIVATIVES; PEPTIDES OR PROTEINS; LIGNINS OR REACTION PRODUCTS THEREOF

| 384    | <pre>Blood coagulation factor II or<br/>factor II + VII + IX + X, i.e.,<br/>prothrombin complex or factor</pre> | 388.24 | Binds hormone or other<br>secreted growth regulatory<br>factor, differentiation |
|--------|---|--------|---|
| 385    | Hemoglobins or globins  |        | factor, intercellular   |
| 386    | Globulins   |        | mediator, or neurotransmitter   |
| 387.1  | Immunoglobulin, antibody, or  |        | (e.g., insulin, human   |
|        | fragment thereof, other than  |        | chorionic gonadotropin,   |
|        | immunoglobulin antibody, or   |        | intragonadal regulatory   |
|        | fragment thereof that is  |        | protein, Mullerian inhibiting   |
|        | conjugated or absorbed  |        | substance, inhibin, epidermal   |
| 387.2  | Anti-idiotypic  |        | growth factor, nerve growth   |
| 387.3  | Chimeric, mutated, or   |        | factor, dopamine,   |
|        | recombined hybrid (e.g.,  |        | norepinephrine, etc.)   |
|        | bifunctional, bispecific,   | 388.25 | Binds plasma protein, serum   |
|        | rodent-human chimeric, single   |        | protein, or fibrin (e.g.,   |
|        | chain, rFv, immunoglobulin  |        | clotting factor, fibrinolytic   |
|        | fusion protein, etc.)   |        | factor, complement factor,  |
| 387.5  | Binds oligosaccharide   |        | immunoglobulin,   |
|        | structure   | 388.26 | apolipoprotein, etc.)Binds enzyme   |
| 387.7  | Binds expression product of   | 388.3  | Binds enzymeBinds virus or component or   |
|        | cancer-related gene or  | 300.3  | product thereof (e.g., virus-   |
|        | fragment thereof (e.g.,   |        | associated antigen, etc.)   |
|        | oncogene, proto-oncogene, etc.)   | 388.35 | Binds retrovirus or   |
| 387.9  | Binds specifically-identified   |        | component or product thereof  |
| 307.5  | amino acid sequence   |        | (e.g., HIV, LAV, HTLV, etc.)  |
| 388.1  | Monoclonal  | 388.4  | Binds bacterium or similar  |
| 388.15 | Human   |        | microorganism or component or   |
| 388.2  | Binds microorganism or  |        | product thereof (e.g.,  |
|        | normal or mutant component or   |        | Stretococcus, Legionella,   |
|        | product thereof (e.g., animal   |        | Mycoplasma, bacterium-  |
|        | cell, cell-surface antigen,   |        | associated antigen, exotoxin,   |
|        | secretory product, etc.)  | 388.5  | etc.)   |
| 388.21 | Binds nucleic acid or   | 300.3  | Binds fungus or plant cell or component or product                              |
|        | derivative or component   |        | thereof (e.g., fungus-  |
|        | thereof (e.g., DNA, RNA, DNA-   |        | associated antigen, etc.)   |
|        | RNA hybrid, nucleotide,   | 388.6  | Binds parasitic protozoan   |
|        | nucleoside, carcinogen-DNA  | 300.0  | or metazoan cell or component   |
| 200 00 | adduct, etc.)   |        | or product thereof (e.g.,   |
| 388.22 | Binds receptor (e.g.,   |        | Dirofilaria, Eimeria,   |
|        | transferrin receptor, Fc  |        | Coccidia, Trichinella,  |
|        | receptor, dihydropyridine receptor, IL-2 receptor, etc.)  |        | parasite cell-surface antigen,  |
| 388.23 | Binds lymphokine, cytokine,   |        | etc.)   |
| 300.23 | or other secreted growth  | 388.7  | Binds hematopoietic cell or   |
|        | regulatory factor,  |        | component or product thereof  |
|        | differentiation factor, or  |        | (e.g., erythrocyte  |
|        | intercellular mediator  |        | granulocyte, macrophage,  |
|        | specific for a hematopoietic  |        | monocyte, platelet,   |
|        | cell (e.g., interleukin,  |        | myelogenous leukemia cell,  |
|        | interferon, erythropoietin,   |        | <pre>bone marrow stem cell, granulocytic cell-surface</pre>                     |
|        | etc.)   |        | antigen, hemoglobin,  |
|        |   |        | thrombospondin, glycophorin,  |
|        |   |        | etc.)   |
|        |   |        | ,   |

## 530 - 6 CLASS 530 CHEMISTRY: NATURAL RESINS OR DERIVATIVES; PEPTIDES OR PROTEINS; LIGNINS OR REACTION PRODUCTS THEREOF

| 391.5 | Conjugated via a               | 417    | Chromatography or by septum                           |
|-------|--------------------------------|--------|---|
| 371.3 | specifically-identified        | 11/    | selective as to material,                             |
|       | linking group, chelating       |        | e.g., gel filtration,                                 |
|       | group, coordination complex,   |        | molecular sieve dialysis, etc.                        |
|       | coupling agent, or conjugation | 418    | Precipitation   |
|       | agent                          | 419    | With added material                                   |
| 391.7 | Conjugated to a cytotoxic      | 420    | Inorganic   |
|       | agent, drug, or other          | 421    | Polymeric, e.g., polyethylene                         |
|       | biologically-active substance  | 121    | glycol, etc.  |
| 391.9 | Conjugated via a               | 422    | Solvent extraction                                    |
|       | specifically-identified        | 423    | Oxygenated material                                   |
|       | linking group, coupling agent, | 424    | Alcohol   |
|       | or conjugation agent           | 425    | Carboxyl containing                                   |
| 392   | Alpha globulins, e.g.,         | 426    | Hydrocarbon or halogenated                            |
|       | ceruloplastin, haptoglobins,   | 420    | hydrocarbon   |
|       | etc.                           | 427    | Physical treatment                                    |
| 393   | Antithrombin III               | 500    | LIGNINS OR DERIVATIVES                                |
| 394   | Beta globulins, e.g.,          | 501    | .Aldehyde, ketone or ozone                            |
|       | transferrin, etc.              | 301    | reacted with a lignin or                              |
| 395   | .Glycoprotein, e.g., mucins    |        | lignin containing substance,                          |
|       | proteoglycans, etc.            |        | or product thereof                                    |
| 396   | Lectins, e.g., concanavalin,   | 502    | .Compound which includes phenolic                     |
|       | hemagglutinin, etc.            | 302    | hydroxy or oxygen containing                          |
| 397   | Glycoprotein hormones          |        | hetero ring reacted with a                            |
| 398   | Gonadatropins                  |        | lignin or lignin containing                           |
| 399   | .Hormones, e.g., prolactin,    |        | substance, or product thereof                         |
|       | thymosin, growth factors, etc. | 503    | .Hydrogenation of a lignin or                         |
| 400   | .Metal containing, e.g.,       |        | lignin containing substance,                          |
|       | chromoproteins, ferritin,      |        | or product thereof                                    |
|       | ferredoxins, etc.              | 504    | .Carboxylic acid anhydride, or a                      |
| 401   | Cytochromes, e.g., chlorophyl, |        | compound having halogen bonded                        |
|       | orgotein, etc.                 |        | directly to acyclic carbon by                         |
| 402   | .Chemical modification or the  |        | nonionic bonding, reacted with                        |
|       | reaction product thereof,      |        | a lignin or lignin containing                         |
|       | e.g., covalent attachment or   |        | substance, or product thereof                         |
|       | coupling, etc.                 | 505    | .Compound containing nitrogen                         |
| 403   | Protein is identified as an    |        | attached directly or                                  |
|       | antigen, e.g., immunogenic     |        | indirectly to carbon by                               |
|       | carriers, etc.                 |        | nonionic bonding reacted with                         |
| 404   | Sulfur containing reactant     |        | a lignin or lignin containing                         |
| 405   | Nitrogen containing reactant   | F06    | substance, or product therof                          |
| 406   | Oxygen containing reactant     | 506    | .Heavy metal, aluminum, silicon                       |
| 407   | Hydrolysis of protein          | F 0 7  | or phosphorus containing                              |
| 408   | Sulfur containing reactant     | 507    | .Processes utilizing an organic                       |
| 409   | Nitrogen containing reactant   |        | solvent or a compound having alcoholic hydroxy bonded |
| 410   | Oxygen containing reactant     |        | directly to an acyclic carbon,                        |
| 411   | Oxygen containing is           |        | or product thereof                                    |
|       | saccharide                     |        | or produce energor                                    |
| 412   | .Separation or purification    |        |   |
| 413   | Immunological separation or    |        |   |
| 4.1.4 | affinity chromatography        | CDO CC | DEFEDENCE NOT COLLECTIONS                             |
| 414   | Ultra filtration or osmosis    | CKUSS- | REFERENCE ART COLLECTIONS                             |
| 415   | Selective absorbtion, e.g., Ca | 000    | AMMITTADED MENTERS DEPOSED                            |
| 416   | phosphate sorbents, etc.       | 800    | ANTIHYPERTENSIVE PEPTIDES                             |
| 416   | Ion exchange                   | 801    | PEPTIDE SWEETNERS                                     |

| 802  | CHROMOGENIC OR LUMINESCENT<br>PEPTIDES | 842     | .Skin; hair; nails; sebaceous glands; cerumen |
|------|--|---------|---|
| 806  | ANTIGENIC PEPTIDES OR PROTEINS         | 843     | .Digestive system                             |
| 807  | HAPTEN CONJUGATED WITH PEPTIDE OR      | 844     | Stomach; intestine                            |
|      | PROTEIN                                | 845     | Pancreas                                      |
| 808  | MATERIALS AND PRODUCTS RELATED TO      | 846     | Liver   |
|      | GENETIC ENGINEERING OR HYBRID          | 847     | Bile  |
|      | OR FUSED CELL TECHNOLOGY,              | 848     | .Lungs  |
|      | E.G., HYBRIDOMA, MONOCLONAL            | 849     | .Eyes; vessels; umbilical cord                |
|      | PRODUCTS, ETC.                         | 850     | .Reproductive organs or embryos               |
| 809  | .Fused cells, e.g., hybridoma,         | 851     | Placenta; amniotic fluid                      |
|      | etc.                                   | 852     | Sperm   |
| 810  | CARRIER - BOUND OR IMMOBILIZED         | 853     | Ovary; eggs; embryos                          |
|      | PEPTIDES OR PROTEINS AND THE           | 854     | .Glands                                       |
|      | PREPARATION THEREOF, E.G.,             | 855     | PROTEINS FROM ANIMALS OTHER THAN              |
|      | BIOLOGICAL CELL OR CELL                |         | MAMMALS OR BIRDS                              |
|      | FRAGMENT AS CARRIER, ETC.              | 856     | .Snakes; venom                                |
| 811  | .Peptides or proteins is               | 857     | .Fish; fish eggs; shell fish;                 |
|      | immobilized on, or in, an              | 037     | crustacea                                     |
|      | inorganic carrier                      | 858     | .Insects; venom                               |
| 812  | .Peptides or proteins is               | 859     | WASTE, WASTE MATERIAL, REFUSE OR              |
|      | immobilized on, or in, an              | 037     | SLUDGE, E.G., EFFLUENTS, FECAL                |
|      | organic carrier                        |         | MATTER, ETC.                                  |
| 813  | Carrier is a saccharide                | 860     | RENIN INHIBITORS                              |
| 814  | Cellulose or derivatives               | 861     | INVOLVING IGG3, IGG4, IGA, OR IGY             |
|      | thereof                                | 862     | INVOLVING IGE OR IGD                          |
| 815  | Carrier is a synthetic polymer         | 863     | INVOLVING IGM                                 |
| 816  | Attached to the carrier via a          | 864     | . Monoclonal                                  |
|      | bridging agent                         | 865     | Human   |
| 817  | Entrapped within the carrier,          | 866     | INVOLVING IMMUNOGLOBULIN OR                   |
|      | e.g., gel, hollow fibre, etc.          | 800     | ANTIBODY FRAGMENT, (E.G.,                     |
| 820  | PROTEINS FROM MICRO-ORGANISMS          |         | F(AB)'2, FAB', FAB, FV, FC,                   |
| 821  | .Separation of nucleic acid            |         | HEAVY CHAIN, LIGHT CHAIN,                     |
| 822  | .Protozoa                              |         | ETC.)   |
| 823  | .Lower fungi, e.g., mold, etc.         | 867     | INVOLVING IMMUNOGLOBULIN OR                   |
| 824  | Yeasts                                 | 007     | ANTIBODY PRODUCED VIA                         |
| 825  | .Bacteria                              |         | RECOMBINANT DNA TECHNOLOGY                    |
| 826  | .Viruses                               | 868     | INVOLVING AUTOIMMUNITY, ALLERGY,              |
| 827  | PROTEINS FROM MAMMALS OR BIRDS         | 000     | IMMEDIATE HYPERSENSITIVITY,                   |
| 828  | .Cancer                                |         | DELAYED HYPERSENSITIVITY,                     |
| 829  | .Blood                                 |         | IMMUNOSUPPRESSION, OR                         |
| 830  | Plasma; serum                          |         | IMMUNOTOLERANCE                               |
| 831  | Cohn fractions                         |         |   |
| 832  | .Milk; colostrum                       |         |   |
| 833  | .Whey; cheese                          |         |   |
| 834  | .Urine; urinary system                 | FORETGN | ART COLLECTIONS                               |
| 835  | Kidney                                 |         |   |
| 836  | .Mucus; mucous glands; bursa;          | EUD UUU | CLASS-RELATED FOREIGN DOCUMENTS               |
|      | arthral fluid; spinal fluid            | TOK UUU | CHASS-KEHATED FOREIGN DOCUMENTS               |
| 837  | .Lymph; lymph-glands; thymus           |         |   |
| 838  | .Marrow; spleen                        |         |   |
| 839  | .Nerves; brain                         |         |   |
| 840  | .Bones; tendons; teeth; cartilage      |         |   |
| 841  | .Muscles; heart                        |         |   |
| J 11 |  |         |   |

CLASS 530 CHEMISTRY: NATURAL RESINS OR DERIVATIVES; PEPTIDES OR PROTEINS; LIGNINS OR REACTION PRODUCTS THEREOF

530 - 8
